EXPERIENCE

CAPGEMINI | SOFTWARE ENGINEER
Sept 2023 – Present | Navi Mumbai, Maharashtra
- Trained extensively in leading technologies including Java, Spring Boot, SQL, AWS, Docker, Git, and more.
- Pioneered project management using Java EE, SQL, and Data Structures, leading a cross-functional team to implement solutions; increased system throughput by 35% and decreased error rates by 20%.
- Specialized in crafting efficient solutions for complex problems, consistently delivering impactful software solutions.

CAPGEMINI TRAINING (SOFTWARE ENGINEER)
Feb 2022 – Jun 2022 (Software engineer - evaluation passed, selected.)

SOHAM CONSULTANTS | TRAINEE APPLICATION DEVELOPER
July 2021 – Sept 2021 | Amravati, Maharashtra
- Developed projects using Java Enterprise Edition (Java EE) technologies, including JDBC with MySQL, Servlets, JSP, Spring, Spring MVC, Hibernate, and REST API.
- Implemented interactive frontend features using JavaScript, AJAX, CSS3, HTML5, and Bootstrap.
- Used Eclipse and VS Code for development, managing projects on Apache Tomcat and Wildfly for efficient execution and version control.

PROJECTS

HOME LOAN APPLICATION ⎘ | JAVA EE, SPRING BOOT, HIBERNATE, POSTGRESQL, LOMBOK, SWAGGER, GIT || - NOV 2023
- Designed an online home loan system for easy customer applications, tracking, and information access.
- Developed admin tools for streamlined approval and scheme management.
- Ensuring swift deployment of the home loan application system.

COLLEGE NETWORK APPLICATION ⎘ | JAVA, SPRING BOOT, REACT, HIBERNATE, SQL, LOMBOK, GIT, JAVASCRIPT || FEB - MAR 2024
- Created a college social network for approved students to post articles, chat, and upload images.
- Implemented admin functions for managing faculty and approving student posts.
- Integrated tools for placement officers to create student lists based on criteria, and for staff to view profiles and send event notifications.

SEARCH ENGINE ⎘ | JAVA, MYSQL, WEB-CRAWLER, DSA, JSP, SERVLETS, HTML, CSS, BOOTSTRAP || - JULY 2023
- The project is about implementing a simple search engine and understanding how it works behind the scenes.
- The project allows users to search for the top 30 results according to their query and displays their search history.
- The two main functions of the project are to perform a search and to get user search history
